Quartz[®]

Electric

An electric dream

The ideal choice for retro-fitting electric showers

a dream to use...

- Simple to use – the one touch illuminated controls and easy glide temperature selector make Quartz Electric the ideal choice
- Switch on and shower – you'll always get a constant temperature, whatever the weather
- Over Temperature Protection (OTP) device makes Quartz Electric safe to use for all the family

...and a dream to install

- A generous footprint and a deep cover give lots of extra space to retro-fit without any headaches
- More room for optional cable and water points
- 2 positions for the earth connection to make retro-fit wiring easier
- Fits comfortably over many other models including Triton T80XR, T100XR and Mira Sport

Quartz[®]

Electric

Impressive shower performance

The wide flow range negates the need for fiddly high and low power switches and gives the benefit of increased flow rates in the summer months.

Active nozzles

The patented “active” nozzles move dynamically to give a well defined spray pattern throughout the year. The “Y” shaped nozzles expand fully in the summer to give a luxurious flow pattern.

High flow rate – nozzles expand

Low flow rate – nozzles contract

Rub clean nozzles

The unique handset has easy rub clean nozzles to enable simple cleaning and the removal of limescale to optimise flow rates.

Three invigorating spray patterns

Aqualisa’s optimum handset offers multiple spray patterns to suit your mood. Whether it’s an early morning wake up call or a relaxing after work wind-down, you’ll be sure to find one to suit.

Delayed shutdown

Phased shutdown switches the shower off gradually to flush out hot water. This is an added safety feature for the next user and reduces limescale around the heating element, extending the life of the shower.

Over temperature protection

The patented (applied for) OTP system protects the user from selecting dangerously high temperatures making it ideal for use by all the family. The clever OTP system overrides the user selection if the temperature exceeds 45°C. The temperature sensor in the outlet is designed to activate to allow more flow into the element, quickly avoiding any temperature spike, unlike other Electric showers in its class.

Optimum flow control

The Quartz Electric heating element is at maximum power all the time, meaning that users do not have to select a High, Medium or Low setting to cope with changes in inlet water temperatures during the year... simply switch on and start showering.

Double protection from pressure fluctuations

Within the shower there are two flow regulators to protect the user against the effects of any changes in water pressure.

Simple one touch controls

Soft touch illuminated controls and an easy glide temperature selector eases operation for both young and old.

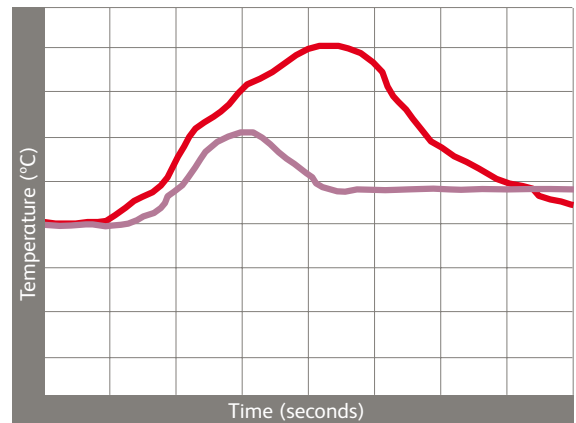

Designed specifically to ease retro-fit installations

As you would expect from Aqualisa, we have talked to many installers to understand the frustrations of fitting an electric shower. As a result we have designed the unit with more room for optional cable and water entry points and 2 positions for earth connections to improve wiring access. The generous footprint and deeper cover aids retro-fit installations and can cover screw holes made in tiling by a previous shower.

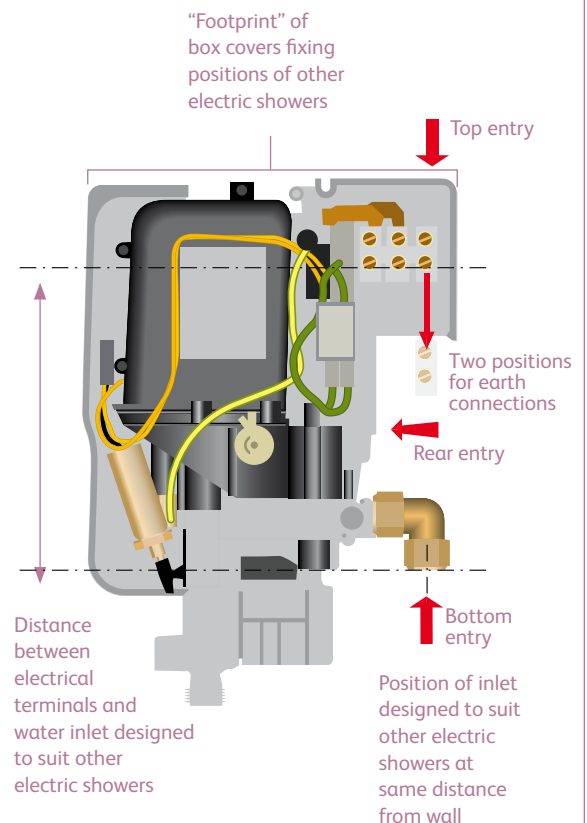

OVER TEMPERATURE PROTECTION

Quartz Electric with OTP system

Competing electric shower

DESIGNED FOR EASY RETRO-FIT

Part of the Quartz Collection

One of the easiest showers in its class to install

Designed specifically to address all installers' requirements for both new and retro-fit installations with little disruption to the bathroom.

Simple one touch operation

No confusing settings – simply push the button and start showering.

Striking design

Our showers are renowned for their contemporary design and outstanding performance. Built to last, Aqualisa showers are rigorously tested to give you the perfect shower every time.

Patented innovations

Aqualisa have invested heavily in engineering and research to bring you a new way of installing and using an electric shower. Our desire to break the mould in approaching common installer and user frustrations have led to many innovations within the Quartz Electric range.

2 year no catch guarantee

Aqualisa are confident that your shower will give you years of trouble free operation. However, for peace of mind all our electric showers are covered by a 2 year manufacturer's guarantee.

Photographic installation instructions

Who else gives you step-by-step easy to use instructions – no need to wade through reams of text... just get on with the job of installing.

Great service back up

In the unlikely event that you do have a problem with your shower, you can call our customer helpline to talk through any issues or simply ask for advice or inspiration. Our nationwide coverage of Approved Service Engineers means we are never far away to help.
